

Cut'n Move

Robotic tile cutting

Cut'n Move is a revolutionary, first-of-its-kind mobile robotic solution for on-site cutting of construction tiles.

Cut'n Move is created to free pavers from the tedious and straining work of tile cutting. Working in sync with a conventional paving process, it automates the cutting process and triples the productivity.

The system comes fully equipped in a trailerbased solution with a 6-axis cloud-connected robot for the full degree of cutting freedom and an onboard generator for autonomous power supply.

The whole system is operated through an easy-to-use iPad interface with a fleet manager software that makes you able to track and measure your entire fleet.

Increased productivity

Eliminate tiresome work tasks and enable workers to do multiple task at a time

Reduced noise levels

Enables on sight cutting in urban areas and good work environment for employees

Minimal dust particles

Creates a more healthy environment and eliminate annoyances for the area
